Miradi Threats Ranking matrix

Threats \ Targets	Alpine meadows ...	Conifer forests	Glacier and Glaci...	NTFPs/MAPs	Red panda	Snow leopard	Broadleaf forests	Musk deer	Summary Threat Rating
Forest fire		High			High		High	High	High
Unsustainable extraction of NTFPs/MAPs				High					Medium
Illegal/unregulated trade of wildlife parts and plants				High	Medium	Medium		High	High
Poaching					Medium	Medium		Very High	High
Human wildlife conflict						High			Medium
Encroachment (Agriculture and settlement)	Medium	Low				High	Low		Medium
Unregulated grazing	High	Low		High			High		High
Climate change	High	High	High				Medium		High
Summary Target Ratings:	High	High	Medium	High	Medium	High	High	High	Overall Project Rating High

Strategic Objectives

- 1. Mobilize local communities**
- 2. Enhance transboundary cooperation**
- 3. Pilot community based climate change adaptation projects**
- 4. Ensure equitable benefit sharing**

Mobilizing local communities

Key Achievement: strengthening community based anti poaching operation units

Enhancing transboundary cooperation

Key Achievement: transboundary meeting with Chief Conservator-Forest and Wildlife, Sikkim, India

**Piloting community based
climate change adaptation
projects**

**Key Achievement: Created
alternative income source for
vulnerable communities
through Red Panda Eco-Trail**

Tourism Project

Key Lessons Learned

- Mobilizing local communities:
 - Community Based Anti Poaching Operations more effective than army led patrols
- Enhancing transboundary cooperation:
 - Transboundary interaction between civil society and local governments creating critical platform for dialogue.
- Piloting climate adaptation projects:
 - Creating opportunities for alternative income generation (such as tourism) is important for community resilience to climate change

Financial Sustainability

Financial Sustainability

Sustainability scenario/feasibility

- i) Kangchenjunga Conservation Area Council collects \$28-\$30 USD per tourist per entry
- ii) Sub-committees such as Conservation User's Committee, collect 75 % of timber and NTFP harvesting fees
- iii) Undertaking Forest Carbon inventory in SHL

Financial Sustainability

iv) proposed Trophy Hunting plan of Blue sheep

Financial Sustainability

Challenges

- i) Fund raising capacity of KCAMC
- ii) Establish carbon inventory in SHL
- iii) Promoting and developing Kanchenjunga as a eco-tourism destination
- iv) Vertical terrain and remoteness hinders sustainable development

Financial Sustainability

Ways of Achieving FS

- i) Provided proposal writing training to KCAMC
- ii) Endorsed by Government to carry out carbon inventory in SHL
- iii) Undertook Red Panda Eco-trail feasibility study
- iv) Trophy Hunting plan of Blue sheep
- iv) SCAPES Project has pioneered transboundary cooperation with India that could lead to transboundary tourism in future with India and eventually China

Thank You
